

FAQ

Subject : Difference of UVC Sensor, UVC LED Sensor

Date : 2020. 06. 29.

* UVC sensor and UVC LED sensor have different detection wavelength range as below.

Division	Package Type	Product Name	Detection Range	Appliance
UVC LED	SMD3535	GUVCL-S10GD	220nm ~ 320nm	UVC LED Monitoring (265,270,275,280nm ..etc)
	TO-46	GUVCL-T10GD		
	TO-5	GUVCL-T21GH		
UVC (253.7nm UVC Lamp)	SMD3535	GUVCL-S10GD	220nm ~ 280nm	Sterilization Lamp (UV-C Lamp) Monitoring (UV Water Sterilization, UV Air Purification) Flame Sensing
	TO-46	GUVCL-T10GD		
		GUVCL-T10GD-L		
	TO-39	GUVCL-T20GD-U		
TO-5	GUVCL-T21GH			

The Reason why we need the private using sensor for UVC LED

=> The UVC LED (Blue Line) Can exactly measure the range of UVC Led(Red Line) that UVC Sensor Can not Measure.
